FONOF

Designed for users, devices, and schools

Supporting successful phone-free programs

Improve Focus

Reduce Distractions

Encourage Engagement

Across Europe, schools are looking for simple, effective and durable solutions to support the implementation of phone-free programs.

These initiatives help improve focus, reduce classroom distractions, encourage healthier digital habits and create more engaging learning environments.

While most systems share the common objective of temporarily securing access to smartphones, not all solutions are designed in the same way.

FONOF was developed with a clear ambition: to provide an approach designed around users, devices and the realities of everyday school life.

Thanks to its proprietary locking technology, dedicated unlocking base and scalable ecosystem, FONOF offers an alternative designed to meet the needs of today's educational institutions.

Developed by Naotic, specialist in educational device management solutions since 2012.

Keep the smartphone. Remove the distraction.

A phone-free program is only effective if it is easy to understand and simple to use.

FONOF has been designed to integrate naturally into everyday school life.

An approach based on user autonomy

Unlike solutions that rely on collecting or storing devices, FONOF allows users to keep their smartphone with them throughout the phone-free period.

This approach promotes:

- **User responsibility**
- **No collective storage**
- **Greater acceptance**
- **Reduced logistics**

Benefits

✓ Simple and intuitive operation
✓ Fast daily routines
✓ Users keep possession of their smartphone
✓ No collection or storage logistics
✓ Suitable for large-scale deployments

A solution designed to be used easily, every day.

Why schools choose FONOF

✓ **Students keep possession of their smartphone**
✓ **No collection or storage logistics**
✓ **Fast locking and unlocking**
✓ **Compatible with most smartphones and protective cases**
✓ **Designed for large-scale deployments**
✓ **RF shielding integrated**
✓ **School branding available**

The smartphone never leaves its owner

A Simple 4-Step Process

1. Store the Smartphone

Simply place the smartphone inside the FONOF pouch.

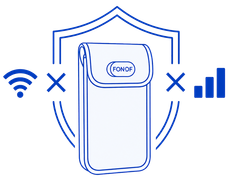

Compatible with smartphones up to 7 inches, even when fitted with a protective case.

2. Close the Pouch

A simple action activates the magnetic locking mechanism.

Fast and intuitive, locking takes only a few seconds.

3. Isolate the Device

Once locked, the smartphone remains securely stored inside the pouch.

The integrated RF shielding lining helps prevent communications, making the device inoperative throughout the phone-free period.

4. Unlock Instantly

When access to the smartphone is authorised, simply insert the locking mechanism into the FONOF unlocking base.

Unlocking is immediate, simple, fast and intuitive.

A smarter approach to phone-free programs.

Designed for everyday school life

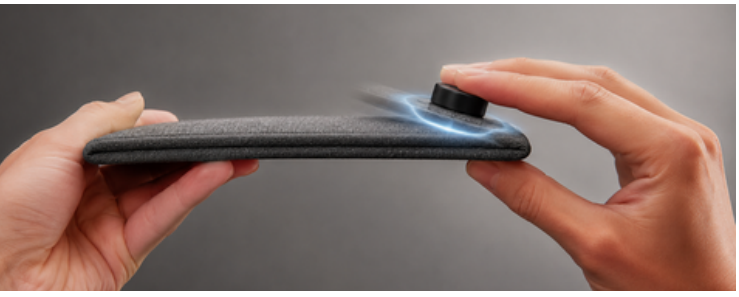

FONOF

Durable by design

Designed for intensive daily use, FONOF combines recycled 600D R-PET polyester with a water-repellent finish, delivering durability while supporting a more responsible use of materials.

Customisation with the school's or authority's name, Logo or branding is also available.

Compatible with smartphones up to 7 inches with protective cases,

Designed to accommodate most smartphones used in schools without removing their protective case.

Integrated RF shielding lining

The pouch incorporates an RF shielding lining designed to prevent radio-frequency communications when the smartphone is inside the locked pouch.

This approach helps render the smartphone inoperative throughout the phone-free period and reinforces the overall effectiveness of the solution.

Simplified identification and management

- transparent ID pocket
- dedicated writing area
- school branding options

A pin-free Technology

FONOF's proprietary magnetic locking technology does not require a pin, needle or perforating component.

Designed for everyday educational use, it helps protect devices, supports safe handling and simplifies daily operations.

Fast and intuitive locking takes only seconds, making large-scale deployment easier for schools and educational organisations.

Key product features

✓ Recycled 600D R-PET polyester construction
✓ Water-repellent fabric
✓ Integrated RF shielding lining
✓ Transparent ID pocket
✓ Dedicated writing area
✓ School branding options
✓ 2-year warranty

FONOF protects users, devices and the integrity of phone-free programs.

More than just a pouch

Implementing a successful phone-free programme is not only about securing smartphones. It also requires practical tools that support deployment, local procedures and authorised access.

Built for school-wide deployment

FONOF combines a dedicated unlocking base, identification features and customisation options designed specifically for educational environments.

Schools can define where, when and by whom unlocking procedures take place, helping maintain consistency across daily operations and large-scale deployments.

Additional security option

For organisations requiring enhanced control, an optional security mounting plate can be used to physically secure the unlocking base and restrict access to authorised personnel only.

Key benefits

✓ Dedicated unlocking system
✓ Controlled unlocking points
✓ Adaptable to local procedures
✓ Optional security mounting plate
✓ Designed for large-scale deployments

A support framework for successful deployment

Practical, customizable resources to support every stage of the project, from preparation to day-to-day implementation.

Understand
Why take action? Benefits, objectives, and stakeholders.

Plan
Build the project and prepare for deployment.

Implement
Communicate with parents, students, and staff.

Support
Resources, FAQs, and continuous improvement.

What this framework provides in practice

Save time
Templates that are ready to be customized rather than starting from scratch.

Harmonize practices
Resources tailored to teams, families, and students.

Facilitate adoption
Resources tailored to each audience.

Support a smooth deployment
Clear guidelines for handling everyday situations.

Strong expertise behind FONOF

FONOF combines **Naotic's expertise in digital deployments** in schools and local authorities **with PORT Designs Group's know-how in the design and manufacture of carrying solutions for digital devices.**
